- Good reading performance on 1D linear codes
- USB, RS-232, Keyboard Wedge, IBM 46XX and Wand
- 'Green Spot' technology for good-read feedback

**OPIS PRODUKTU**

For customers who want the high performance associated with laser scanning technology, the Gryphon GD4300 scanner is an ideal solution providing longer reading distances, snappy performance with a bright, well-defined scan line. Poor quality bar codes and low contrast labels with bad edge definition are not a problem for this Gryphon scanner, plus Datalogic's patented Green Spot provides visual good-read feedback directly on the code, allowing for fast and accurate scanning which is especially useful in noisy environments or in places where 'beep-free' reading is desired. The Gryphon GD4300 readers offer a choice of two sets of multi-interface options: USB, Keyboard Wedge, RS-232 and Wand Emulation, or for use at the point-of-sale (POS), IBM 46XX, USB and RS-232.
